

Professional Summary

Software Engineer with 4+ years experience in **full-stack development** and machine learning, specializing in **python, flask, java and gen AI solutions**. Proven track record in implementing innovative technical solutions across **cloud platforms and AI technologies**.

Technical Skills

- **Languages/Frameworks:** Python, FastAPI, JavaScript, Java,
- **Machine Learning:**
 - **NLP:** RAG Systems, LLM Fine-Tuning (SLMs, OSS Models), Hugging Face (Transformers)
 - **Deep Learning:** PyTorch, TensorFlow
 - **ML Workflows:** LangFlow (LLM orchestration), AI Agents
- **MLOps:**
 - **Deployment:** Flask/Streamlit, Docker/Kubernetes
 - **Cloud:** AWS (EC2, S3, SageMaker, BedRock)
- **Data/Software Engineering:**
 - **Databases:** MySQL, MongoDB, Postgres, Elasticsearch, Vector Store

Experience

- **Gen AI Engineer | Axentia, Pune** **April'25- Present**
 1. **Conversational AI Bot - University of Mississippi**
 - Developed a **hybrid RAG and live web-search** agent with tool-calling capabilities to provide up-to-the-minute information, reducing model hallucinations by over 90%
 - Deployed the bot across 3 platforms (Web, WhatsApp, Telegram).
 2. **Transcript Genie - AI Assistant for Academic Credential Evaluation**
 - Engineered a **multi-stage document analysis pipeline** using an ensemble of OCR models and chained LLM calls to convert international academic records into US GPA equivalents
 - Reduced processing costs by strategically **routing tasks to different models** such as GPT 5, specialized OSS models for simpler tasks and integrating the Groq API for high-speed inference.
- **Software Engineer | Nice Systems, Pune** **Jun'23 - April'25**
 - Deployed **multi RAG system** for product documentation. Which saved at least **25%+** support hours.
 - **Filed US Patent** application for Transformer-based PII data masking system.
 - Driven **Application Scaling** to handle **10K concurrent clients/users** with same resources.
 - Implemented Auto Update Feature with **100% test coverage** and **SCA checks**.
- **Associate Software Engineer | Nice Systems** **Jul'21 – May'23**
 - Responsible for backend development, Reduced **vulnerabilities count** by **50%+**
 - **Stabilized Testing CI pipeline**, Reduced CI test failures by 90%+
 - Worked on **Automation** (Cypress) and **Performance Testing** (Jmeter).
 - Handled critical **production issues**
 - Worked in Agile, CI/CD development environment

Patents

- **Filed US Patent** System and method for intelligent masking of information using machine learning. U.S. Patent App. 18/888,490, filed Nov 2024. Patent pending.
- **Transformer based approach** for identification and **masking of PII data in images**
- Our automation product captures images on agent's screen which needs to be masked manually for **GDPR, CCPA compliance**. No end to end solution was present
- Our invention provides an **end to end solution** for this along with **unique row wise feed** to data to improve accuracy and **identify multi-line PII data**

Uses LLMs, OCR, python

Projects

- **ML Voice Based Covid Diagnosis:** Developed ML-based **COVID-19 screening tool** using voice samples, implementing logistic regression, SVM, and XGBoost models to **detect infection** patterns in **cough recordings**.
 - Achieved 75% accuracy (F1=0.72) on XGBoost ensemble
 - Tested against datasets from Kaggle

Education

- **Pune Institute of Computer Technology, Pune, India**

Bachelors in Information Technology | 2017 - 2021

CGPA: 9.13

Elective Courses taken: Business Intelligence, Social Media Analytics, Soft Computing

Capstone Project: ML-based COVID screening

- **100X Engineers Gen AI Cohort | Apr'25 - Sep'25**

An extremely focused and extensive cohort on GenAI with hands on experience with GenAI advancements.

- AI Agents, Fast API, Model deployment, MLOps
- Diffusion Models (Image/ Video) Flux, Stable Diffusion
- AI Workflow Tools (Comfy Ui, n8n)
- Model optimization techniques

Achievements

- **Certifications:**
 - LLM Prompting (Linkedin Learning | 2024)
 - ML with Big Data (Linkedin Learning | 2023)
 - Docker, Kubernetes (Linkedin Learning | 2023)
- **Honors:**
 - Spot Award: Received Spot Award for driving the major feature (Auto Update and Chatbot) and contribution during a critical release.
 - Patent Recognition: Praised by Management and key people at the org for the innovative idea
- Volunteer at **Event Management Committee** for organizing FUN and CSR Events
 - Coordinated various events at dept level (400+ people)
 - Sports Day, CSR Activities, Festival celebrations
 - Led annual coding contest event CoDay at the org
